Abundant Lighting Announces Appointment of Ohio Agents

Spectrum Lighting to represent its URBARN™ LED Horticultural Lighting Products

Grand Rapids, MI — July 22, 2024 — Today, Abundant Lighting announced the appointment of Spectrum Lighting, headquartered in Columbus, Ohio the agents for horticultural lighting products in Ohio.

The Abundant Lighting’s URBARN brand is designed, developed, and manufactured to provide farmers and growers LED lighting and accessory solutions to achieve superior results when growing indoors.

“URBARN fits our portfolio perfectly,” said Rick Vollhardt, President of Spectrum Lighting. “We specialize in commercial lighting and controls, so the products are a natural extension for the team”.

Positive Customer Impact

Fixtures built in the company’s Grand Rapids facility are created with the ability to control channels of LED diodes of different wavelengths specific to plant photosynthesis. No two plant species have the same lighting requirements so the ability to control the output spectrum can give growers a competitive opportunity to produce a maximum harvest indoors.

“The URBARN “Garden Series” 400-watt blended blue-focused fixture is the best vegetation light that I own” said one customer. “It does a great job of creating strong seedlings,

clones, vegging, and maintaining my mothers.” “In the limited time they have to mature, the plants are sturdy, healthy and ready to produce a great crop.”

URBARN is in the process of introducing a new second generation fixture called Pro Series IFLEX™, using a proprietary 750-watt 5-channel driver specifically designed to provide flexible spectrum for sun loving crops with the need for significant levels of photonic energy. Each of the 5 channels can be independently controlled and contain different diode combinations to let a grower mimic and/or augment the sun.

Product Expertise and Availability

The Spectrum Lighting team represents and provides technical support for more than 20 major, national lighting and electrical brands to architects, builders, and construction professionals. “Spectrum Lighting is a great fit with our way of doing business” said John Walsh, President of Six Companies Global, Abundant Lighting’s parent company. “Their reputation for integrity, timely service and technical expertise is what we look for to build our organization.”

Six Companies Global is a holding group that has a presence through several operations in the State of Michigan that offer a range of products and services.
